# VIRA SHIELD®

# sets the standard!

## AS THE IDEAL RESPIRATORY VACCINE

"I want to have the healthiest cattle available for my customers, that's why I use Vira Shield." Craig Roth, Angus Breeder

## XTEND III® adjuvant and its microsphere emulsion technology make the difference in VIRA SHIELD®!

1. **Vira Shield** the **first** vaccine containing both Type 1 and Type 2 BVD genotypes, stimulates large clones of long-term memory cells. This produces the serological and long-term cell-mediated immunity benefits without the risks associated with live vaccines. (Data on file)
2. **Vira Shield's** microsphere emulsion protects viral antigens from maternal antibody the baby calf receives from the colostrum. (Data on file) Calves obtain active immunity in spite of maternal antibody. (Reprints available)
3. **Vira Shield works:** Grand continues to conduct research on **Vira Shield** products to make them the best in the industry. To date, Grand has completed 28 challenge immunogenicity studies involving 663 animals. **Vira Shield** has a history of 63 million doses sold and used successfully since its introduction in 1986. (Data on file) Virus quality is assured with our Synchrony™ cell line.
4. Grand uses a proprietary "gentle kill" method to preserve protective antigenicity of all viral components. Our vaccines are produced with Grand's exclusive state of the art robot-controlled virus production system.
5. **Vira Shield** contains USDA approved BVD Type 2 strain TN131 since 1986 and is safe for both open and bred cows and can be given anytime. No infecting the ovaries as reported with live vaccines. (Reprints available)
6. Other killed vaccines have not been shown to produce yearlong immunity for Type 2 BVD. They also do not contain the exclusive Extend III® adjuvant.
7. **Vira Shield 2, 3, 4 & 5** have passed USDA safety and efficacy tests for sub-Q and IM administration. (Data on file)

Go with Micotil® first. There's no need to second-guess this therapy. A single-injection is fast, effective and minimizes death loss. Micotil reduces handling stress and gets them back on feed. To treat BRD effectively there's no better value than Micotil. To find out more, talk to your veterinarian, or simply call 1-800-428-4441.

**three times your weight,  
sick and ill tempered.  
so what's it going to be?**

**it's time.**

## General Sessions

- Care of Confined Cattle  
Roger W. Blowey ..... 1
- The Ecology of Shigatoxic *E. coli* O157 and Prospects for On-farm Control  
Thomas E. Besser, Dale Hancock, Dan Rice, Clive Gay, John Gay ..... 6
- Prevalence and Distribution of Antimicrobial Resistance  
David A. Dargatz, Paula J. Fedorka-Cray, Kenneth E. Petersen, Kathy Hollinger, Nora E. Wineland, Linda Tollefson, Kathy Ferris ..... 10
- Measuring Antimicrobial Resistance  
Kathleen M. Ewert ..... 12
- The Issue of Antimicrobial Use in Food Animals  
Stephen F. Sundlof ..... 14
- Making AMDUCA Work in Your Practice  
David Rhoda ..... 17
- The Veterinary Antimicrobial Decision System: Progress of a Project Supported in Part by the AABP  
Michael D. Apley, Virginia R. Fajt ..... 20

## Dairy Sessions

- Immunological Dysfunction in Periparturient Cows— What Role Does it Play in Postpartum Infectious Diseases?  
Marcus E. Kehrl, Jr., Kayoko Kimura, Jesse P. Goff, Judith R. Stabel, Brian J. Nonnecke ..... 24
- Management Alternatives in Mastitis Control and Eradication Programs  
Philip M. Sears ..... 29
- Treatment of Clinical Mastitis: Historic and New Perspectives  
Dawn E. Morin ..... 33
- *Clostridium perfringens* Type A Infection in Cattle  
J. Glenn Songer ..... 40
- Botulism Toxicosis of Cattle  
Robert H. Whitlock, Julie M. Williams ..... 45
- Ruminant Disorders Associated with Pathogens Found within Ensiled Forages  
Bill Seglar ..... 54
- Coping With Catastrophic Ensiled Forage Losses: Case Studies  
Bill Seglar ..... 61

## Beef Sessions

- Introduction of the Issues Related to Antimicrobial Resistance in Beef Production  
G. Kee Jim, P. Timothy Guichon, Oliver C. Schunicht, Brian K. Wildman, Calvin W. Booker ..... 71
- What is Antimicrobial Resistance? Development, Measurement, and Spread  
John F. Prescott ..... 72

- The Use of Antimicrobials in Beef Cattle Health Management and Production and the Development of Antimicrobial Resistant Pathogens and their Transfer to Humans Causing Disease Which is Difficult to Treat  
Dr. Otto M. Radostits ..... 75

## Feedlot/Cow-Calf Sessions

- Economic Impact of Antimicrobial Use in Feedlots  
Calvin W. Booker, P. Timothy Guichon, Oliver C. Schunicht, Brian K. Wildman, G. Kee Jim ..... 111
- Monitoring for Infectious Disease in Cattle Operations  
Paul S. Morley ..... 113
- Using Feedlot Records to Control Antimicrobial Resistance  
Joyce Van Donkersgoed ..... 115
- New Therapies for Calf Diarrhea: Therapy and Prevention for the New Millennium  
Elaine Hunt, Robert Argenzio, Anthony Blikslager ..... 118
- Management Considerations to Control Calf Diarrhea  
William Dee Whittier ..... 123
- A Practitioner's Perspective on Scours in Beef Calves  
James G. Adams Jr. .... 128

## AABP/SFT Joint Session

- Veterinary Reproductive Programs  
James D. Ferguson, David T. Galligan ..... 131
- Effect of Calcium and Energy Status During the Postpartum Period on Reproductive Performance in Dairy Cows  
Carlos A. Risco, William W. Thatcher, Frederico Moreira, Charles R. Staples, H. H. Van Horn ..... 138
- Strategies to Increase Pregnancy Rates  
M. Drost, C.A. Risco, W.W. Thatcher ..... 148
- An Epidemiologic Approach to Investigating Abortion Problems in Dairy Herds  
Mark L. Kinsel ..... 152
- Neosporosis in Cattle  
Mark Anderson ..... 161
- Vaccinations to Optimize Reproductive Efficiency  
Victor S. Cortese ..... 167
- Failure of Passive Transfer in Calves  
Thomas E. Besser, Clive C. Gay ..... 170

## Practice Tips

- Pocket Poker and Nose Lead Pulley  
Don Gardner ..... 174
- Teaser Bulls - "Ring 'em up" — A Modified Penopexy Procedure Utilizing a Bull Nose Ring  
James G. Floyd, Jr., Allen M. Heath, Robert L. Carson, Julie A. Waldrop ..... 175

## **Repeating the Same Step Again and Again is for Line Dancing Not BRD Treatment.**

**Pull the sick cattle. Treat the sick cattle. Pull the sick cattle. Treat the sick cattle. It's a two-step that gets old, and expensive, pretty fast. That's why you should use Baytril® 100 (enrofloxacin) Injectable as your first line treatment for bovine respiratory disease. While most antibiotics only inhibit pneumonia-causing bacteria, Baytril 100 actually kills them. This leads to fast response and quick recovery after treatment. You save time, money, labor and reduce stress.**

**So make Baytril 100 your partner against BRD and stop doing the same second and third line dance. For more information, contact your Bayer representative or call 1-800-633-3796.**
