24TH ANNUAL CONVENTION

PROCEEDINGS

American Association of Bovine Practitioners

September 18-21, 1991
ORLANDO, FLORIDA

Theme: Go For The Magic In Orlando
Standard equipment for the high-performance dairy.

Your producers look to you for help in getting the most out of their dairy operation. They want maximum milk production. To get it, make sure they’re using the best equipment available for maximum reproduction. Cystorelin® (Gonadorelin).

For nearly 13 years, Cystorelin has been the trusted, safe and effective GnRH product for treating cystic ovaries to improve reproduction efficiency.

You know it’s extremely safe, with no adverse effects on pregnant animals. And you know it’s extremely cost-efficient, because of Cystorelin’s high response rate in treating cystic cows to enhance reproductive efficiency.

Use Cystorelin to control ovarian cysts and get a boost in reproductive efficiency. Tell your dairy clients that on every high performance dairy, Cystorelin is standard equipment.

Cystorelin® (Gonadorelin, Abbott)

Description: Cystorelin is a sterile solution containing 50 micrograms of gonadorelin (GnRH) diacetate tetrahydrate per milliliter suitable for intramuscular or intravenous administration. CAUTION: Federal law restricts this drug to use by or on the order of a licensed veterinarian. How Supplied: Cystorelin is available in a concentration of 50 mcg/ml, pH adjusted with potassium phosphate (monobasic and dibasic). Cystorelin is supplied in single vials containing 2 ml of sterile solution. Refer to package insert for full label directions.
PROCEEDINGS
of the
TWENTY FOURTH ANNUAL CONVENTION
AMERICAN ASSOCIATION OF BOVINE PRACTITIONERS
