principle used as a judgment.

as a basis measure,

THE STANDARD

Recognized excellence becomes the standard for those who demand results in the milking parlor or in veterinary practice.

Trusted by veterinarians and reproduction specialists,

Cystorelin® is used in more than three out of four dairy cows treated with a GnRH product.*

It has become the standard by which all other GnRH products are judged. So for clients who

are committed to keeping their dairy herds productive and profitable, it just makes good

sense to recommend Cystorelin, the proven standard in GnRH products.

CYSTORELIN®
