**"I recommend the most complete respiratory protection available - Vista® Once SQ."**

**Ethan Andress, DVM  
North Dakota**

Vista® Once SQ is the most complete respiratory protection available, offering 5-way modified live viral protection in combination with the only avirulent-live culture *Pasteurella* and *multocida Mannheimia haemolytic* protection. And it's backed by respiratory research validating:

- Respiratory duration of immunity of at least:
  - 182 days for Infectious Bovine Rhinotracheitis (IBR)
  - 206 days for Bovine Virus Diarrhea (BVD) Type 1
  - 200 days for BVD Type 2
- Three-day onset of immunity for IBR respiratory protection
- BVD Type 1b cross protection
- BVD Type 2 protection in the face of maternal antibodies

The five-way protection of Vista also is available in combination with the only single-dose *Lepto hardjo-bovis* protection: Vista 5 VL5 SQ.

Offer the most complete respiratory protection available — recommend Vista vaccines to your clients today.

**Vista® Once SQ**  
Available in 10 & 50 dose

PROCEEDINGS  
of the  
FORTY-FIFTH ANNUAL CONFERENCE  
AMERICAN ASSOCIATION OF BOVINE PRACTITIONERS

September 20-22, 2012

Montreal, Canada

# AABP OFFICERS

President-Elect  
**NIGEL COOK**  
DVM  
Madison, Wisconsin

President  
**BRIAN GERLOFF**  
DVM  
Woodstock, Illinois

Vice-President  
**DAN GROOMS**  
DVM  
Madison, Wisconsin

Past-President  
**CHRISTINE NAVARRE**  
DVM  
Baton Rouge, Louisiana

Exec. Vice-President  
**M. GATZ RIDDELL, JR.**  
DVM  
Auburn, Alabama

---

## Directors

District 1  
**MARK J. THOMAS**  
DVM  
Carthage, New York

District 2  
**BOB CLONINGER**  
DVM  
Centre Hall, Pennsylvania

District 3  
**JIM BRETT**  
DVM  
Starkville, Mississippi

District 4  
**GARY KOESTER**  
DVM  
Cadillac, Michigan

District 5  
**GLEN JOHNSON**  
DVM  
Reedsburg, Wisconsin

District 6  
SARAH OVERBY  
DVM  
Freeport, Minnesota

District 7  
RODNEY CHAPMAN  
DVM  
Versailles, Missouri

District 8  
GLENN ROGERS  
DVM  
Aledo, Texas

District 9  
DAVID RETHORST  
DVM  
Hastings, Nebraska

District 10  
STEPHEN SMALLEY  
DVM  
Chandler, Arizona

District 11  
FRED MULLER  
DVM  
Sunnyside, Washington

District 12  
GUY R. BOISCLAIR  
DVM  
Victoriaville, Quebec, Canada

District 13  
J. EGAN BROCKHOFF  
DVM  
Olds, Alberta, Canada

Treasurer  
BRIAN REED  
DVM  
Manheim, Pennsylvania

Exhibits Manager  
CHARLIE HATCHER  
DVM  
College Grove, Tennessee

Editor  
ROBERT A. SMITH  
DVM  
Stillwater, Oklahoma

Parliamentarian.....Rich Meiring, DVM, Starkville, Mississippi  
AVMA Delegate ..... Mark Spire, DVM, Manhattan, Kansas

# Table of Contents

## GENERAL SESSIONS

- Grumpy old vets revisited  
Ken Nordlund..... 1
- Adapting beef practice to future realities  
G. Kee Jim..... 7
- The buyer’s point of view about animal welfare: what milk purchasers are looking for  
Jennifer B. Walker..... 11
- Dairy stockmanship – Reconnecting the people with the cows  
Paul Rapnicki, Margaret Perala, Don Höglund..... 13
- Fee structure models in dairy practice  
Mark Thomas ..... 20
- Beef practice models  
Murray D. Jelinski ..... 22
- Veterinary technicians: The case for their employment in bovine practice  
Sarah Wagner ..... 26
- The Summer Dairy Institute: Advanced training for young dairy veterinarians  
Charles W. Nydam, Daryl V. Nydam, Charles L. Guard, Robert O. Gilbert, Steve Eicker ..... 28

## BEEF SESSIONS

- Integrated program for reducing bovine respiratory disease complex in beef and dairy cattle coordinated agricultural project (BRD CAP)  
Alison L. Van Eenennaam..... 36
- What’s new in timed artificial insemination and assisted reproduction in beef cattle?  
Reuben J. Mapletoft, Gabriel A. Bó..... 40
- Case-based studies of infertility in bulls  
A.D. Barth..... 50
- The potential value of DNA-based tests for host bovine respiratory disease resistance to the beef cattle industry  
Alison L. Van Eenennaam..... 60
- A beef producer’s view of the role of bovine practitioner  
J. P. Rhea ..... 66
- Past, present, and future – rural veterinarian  
Murray D. Jelinski ..... 69
- Cattle market update – What we need to know  
Anne Dunford ..... 73
- Using mixed treatment comparison meta-analysis to compare interventions in bovine practice  
Annette M. O’Connor..... 76

## DAIRY SESSIONS

- Why cows die on dairies  
Franklyn Garry, Craig McConnel ..... 82
- Mortality in different management systems  
Chad D. Dechow, Robert C. Goodling..... 88
- The behavioral and physiological consequences of overstocking dairy cattle  
Julie M. Huzzey, Marina A. G. von Keyserlingk, Thomas R. Overton..... 92
- Managing high-risk fresh cows  
Garrett R. Oetzel ..... 98
- The importance of dairy herd health provision and data management, with a focus on mastitis control  
Martin Green, Andrew Bradley, Chris Hudson, James Breen, Jonathan Statham, Jon Huxley ..... 105

- Drug usage hazard analysis and critical control points (HACCP)  
David A. Rhoda..... 110
- Parlor performance basics  
David A. Reid..... 114
- Reproductive tract infection and inflammation in dairy cows  
Stephen LeBlanc ..... 116
- Estrous detection and timed AI protocols: complementary not mutually exclusive  
Ricardo Chebel..... 123

## AABP-AASRP JOINT SESSIONS

- Diagnosis and control of small ruminant abortion  
Paula I. Menzies..... 129
- Q fever update  
Paula I. Menzies..... 138
- Pregnancy toxemia and metabolic changes of transition in small ruminants  
Robert J. Van Saun..... 142
- Selenium nutrition and therapy in small ruminants  
Robert J. Van Saun ..... 148
- Understanding copper nutrition in small ruminants  
Robert J. Van Saun ..... 155
- Johne’s disease in sheep and goats  
Paula I. Menzies..... 161

## STUDENT SESSION

- Difficult conversations with clients  
Glennon Mays ..... 170
- Difficult conversations with colleagues and staff  
Keith Sterner ..... 175

## RESEARCH SUMMARIES I

- Evaluation of environmental culture to determine herd status for Johne’s disease on Atlantic Canadian dairy farms  
C.J. Lavers, G.P. Keefe, S.L.M. McKenna, I.R. Dohoo, M. Chaffer..... 178
- Evaluation of the milk ELISA to determine herd status for Johne’s Disease  
C.J. Lavers, G.P. Keefe, S.L.M. McKenna, I.R. Dohoo, M. Chaffer..... 179
- Effect of season and lactation stage on the diagnostic sensitivity of direct real-time PCR assay for detection of fecal shedding of *Mycobacterium avium* subsp *paratuberculosis*  
E. Laurin, G. Keefe, S. McKenna, M. Chaffer ..... 181
- Preliminary program outcomes from the Atlantic Johne’s Disease Initiative  
Karen MacDonald-Phillips, Greg Keefe, Shawn McKenna..... 182
- Intramammary infection at calving following Petrifilm-based selective dry cow therapy  
M. Cameron, G. Keefe, J. P. Roy, K. MacDonald ..... 183
- Preliminary results from a non-inferiority clinical trial evaluating the efficacy of three commercial dry cow mastitis preparations  
A. G. Arruda, S. Godden, P. Rapnicki, P. Gorden, L. Timms, S. Aly, T. Lehenbauer, J Champagne..... 184
- Risk factors for *Prototheca* mastitis on Ontario dairy farms  
Laura Pieper, Ann Godkin, David Kelton..... 185

- Understanding and controlling variability of iodine concentration in bulk-tank milk in Canada  
K. MacDonald, G. Keefe, J. Sanchez, J.P. Roy, D. Kelton, S. Hendrick..... 186
- Evaluation of a Petrifilm-based on-farm culture system for the detection of intramammary infections in cows with low somatic cell counts at dry-off  
M. Cameron, G. Keefe, J. P. Roy, K. MacDonald ..... 187
- The association between  $\beta$ -hydroxybutyrate concentration at diagnosis of left displaced abomasum in dairy cows and removal from the herd post-surgical correction  
William Croushore, Paula Ospina, David Welch, Daniel Zawisza, Daryl Nydam..... 189
- Profitability of preconditioning: lessons learned from an 11-year case study of an Indiana beef herd  
W. Mark Hilton, Nicole J. Olynk ..... 190
- Comparison of 5-day versus 7-day CIDR CO-Synch protocol in crossbred commercial beef cows  
S.C. Holland, D.W. Whittier, S.G. Clark, J.F. Currin, H.H. Schramm, R.K. Kasimanickam..... 191
- Isolation of *Mycobacterium avium* ssp *paratuberculosis* from the saliva of cattle: a pilot study  
U. S. Sorge, S. Kurnick, S. Sreevatsan..... 192
- Efficiency of a genetic test to detect benzimidazole-resistant *Haemonchus contortus* nematodes on sheep farms in Québec  
V. Barrere, R.K. Prichard ..... 193

**RESEARCH SUMMARIES II**

- Milk flow obstruction caused by varicose veins in the teats in dairy cattle: 22 cases  
H. Lardé, S. Nichols, A. Desrochers, M. Babkine, D. Francoz, P. Y. Mulon ..... 195
- Digital dermatitis: a description of lesion progression and regression of natural disease in Holstein dairy cattle over two years  
A. Krull, P. Gorden, J. Shearer, B. Leuschen, P. Plummer ..... 197
- Pharmacokinetics and milk elimination of flunixin meglumine in dairy cattle following different routes of administration  
L. Kissell, G.W. Smith, T.L. Leavens, R.E. Baynes, J.E. Riviere..... 198
- Temporal changes in antimicrobial resistance of fecal coliforms isolated from dairy cows  
E.M. Corbett, B. Norby, L.W. Halbert ..... 199
- Reproductive performance with an automated activity monitoring system versus a synchronized breeding program  
Rafael C. Neves, Stephen J. LeBlanc..... 200
- Detection of hyperketonemia in dairy cows: “in-lab” milk components performance  
J. Denis-Robichaud, J. Dubuc, D. Lefebvre, L. DesCôteaux..... 201
- Comparison of crossbred and purebred Holstein cows during the transition period  
L. G. D. Mendonça, N. B. Litherland, M. A. Ballou, R. C. Chebel..... 203
- Efficacy of a combination butaphosphan-cyanocobalamin product and insulin for the treatment of ketosis in lactating dairy cattle  
J.L. Gordon, T.F. Duffield, T. Herdt, L. Neuder, D.F. Kelton, S.J. LeBlanc..... 205

- Comparison of serum concentrations and duration of BVDV 1, BVDV 2, BHV-1, BRSV, and PI3 virus-neutralizing antibodies in calves fed maternal colostrum or a colostrum replacer at birth  
M.F. Chamorro, P.H. Walz, D.M. Haines, T. Passler, T. Earleywine, M.D. Givens..... 206
- A randomized clinical trial to evaluate the effect of oral zinc supplementation as a treatment for diarrhea in neonatal Holstein calves  
A. D. Glover, B. Puschner, H. A. Rossow, J. D. Champagne, P. C. Blanchard, T. W. Lehenbauer, S. S. Aly ..... 207
- Health care metrics and health care policies during the preweaned period on calf ranches  
W.L. Walker, W.B. Epperson, T.E. Wittum, L.K. Lord, P.J. Rajala-Schultz, J.L. Lakritz ..... 209
- Otitis media and interna in dairy calves : a retrospective study of 29 cases  
V. Bernier Gosselin, G. Fecteau, D. Francoz, A. Desrochers, S. Nichols, M. Babkine ..... 210
- Ultrasound evaluation of tympanic bulla in calves  
V. Bernier Gosselin, M. Babkine, S. Nichols, A. Desrochers..... 211

**RESEARCH SUMMARIES III**

- Use of neurostimulation to localize and anesthetize the brachial plexus of calves undergoing metacarpal surgery  
H. Lardé, S. Nichols, A. Desrochers, G. Bussièeres, M. Kopal, ..... 212
- Surgery of the bovine rumen: indications and factors relating to outcomes in cattle in Ohio and Kansas  
AK Hartnack, MR Rousseau, AJ Niehaus, DE Anderson... 214
- An evaluation of the prevalence of BHV-1 abortions based on diagnostic submissions to five U.S. veterinary diagnostic laboratories  
S. Gould, A.M. O’Connor, V. Cooper ..... 215
- Real-time PCR assay for trichomonosis on pooled direct preputial samples  
A. Garcia Guerra, J. E. Hill, J. Campbell, C. Waldner, S. Hendrick ..... 216
- Clinical sensitivity and specificity of a quantitative PCR assay for bovine genital campylobacteriosis in bulls  
A. Garcia Guerra, B. Chaban, J. E. Hill, C. Waldner, S. Hendrick ..... 217
- Bovine coronaviruses from the respiratory tract: antigenic and genetic diversity  
R. W. Fulton, J. F. Ridpath, L. J. Burge ..... 218
- A survey of herd-level risk factors for bovine respiratory disease (BRD) in nursing beef calves  
A. R. Woolums, R. D. Berghaus, D. R. Smith, B. J. White, T. J. Engelken, M. Irsik, D. K. Matlick, A. L. Jones, R. W. Ellis, I. J. Smith, G. L. Mason, E. R. Waggoner ..... 219
- Immune, health, and growth responses of beef calves administered modified-live virus respiratory vaccine in the presence of maternal antibody versus a traditional vaccination regimen  
J. G. Powell, J. T. Richeson, E. B. Kegley, K. P. Coffey, G. F. Erf, D. T. Ensley ..... 220
- A survey to evaluate anthelmintic resistance of gastrointestinal stongyles in Iowa cow/calf operations  
T. J. Engelken, M. J. Kimber, T. A. Day, S. S. Ubben, A O’Connor, L. R. Ballweber, P. K. Evans, R. D. Dewell, C. Wang..... 221

- Biosecurity practices of midwestern veterinarians in food animal and mixed animal practices  
T. J. Engelken, D. Bickett-Weddle, C. Wang .....222
- The use of homeopathic remedies for the treatment of calves with diarrhea  
E. M. Boldyreva .....223
- Effect of demographic trends in livestock inventory and number of operations on food animal veterinary practices in the United States  
G. M. Schuenemann, W. P. Shulaw .....224
- Results of anti-mortem screening methodology to predict prescribed drug withholding periods for flunixin and ceftiofur in heifers  
S. Jones, J. Wells, D. Griffin, K. Shuck, T. Goldsmith, P. Rapnický .....225
- Identification and antimicrobial resistance of *Bibersteinia trehalosi*  
G. A. Dewell, C. Thompson, P. J. Plummer, T. Frana, R. D. Dewell, G. J. Phillips .....227

**RESEARCH SUMMARIES IV**

- Feeding heat-treated colostrum reduces morbidity in preweaned dairy calves  
S. M. Godden, D. J. Smolenski, M. Donahue, J. M. Oakes, S. Wells, J. Fetrow .....228
- Effect of heat-treatment on nutritional and immune factors in bovine colostrum  
S. M. Godden, K. Hausler, N. Koewler, K. Brakefield, M. Van Amburgh, P. Rapnický .....229
- Evaluation of serum immunoglobulin G concentrations in dairy calves by use of using an automated turbidimetric immunoassay  
M. L. Alley, D. M. Haines, G. W. Smith .....230
- Influence of season, ambient temperature, and time until feeding on bacteria counts in pasteurized milk for dairy calves  
D. J. Wilson, G. M. Goodell, T. Kelly .....231
- Evaluation of the surface area of P3 in dairy calves following changes in management systems  
J. A. Gard, D. R. Wilhite, D. C. Taylor, S.P. Rodning, M. Edmondson, K. Sanders .....232
- Effect of housing type on health of preweaned dairy calves during summer in Florida  
G. Peña, E. Kunihiro, M. J. Thatcher, C. Risco .....233
- It doesn't take longer to keep good health records on dairies  
S. K. Giebel, J. R. Wenz, S. A. Poisson, D. A. Moore, C. S. Schneider .....234
- Measuring a milk response - lactation models add power  
J. L. Ehrlich, J. B. Cole, D. Null .....235
- Randomized clinical trial to compare the efficacy of two different antimicrobials on cure, milk production, and reproductive performance of dairy cows diagnosed with metritis  
D. A. Moore, M. W. Overton, W. M. Sischo .....236
- Peripartum haptoglobinemia identifies dairy cows at risk for retained placenta and metritis  
J. Dubuc, M. A. G. von Keyserlingk, S. J. LeBlanc .....237
- The coefficient of determination between NEFA and BHBA and the association between their ratio and the development of disease in healthy cows sampled during the post-partum period  
P. A. Ospina, D. V. Nydam, T. Stokol, T. R. Overton .....238

- Effects of prepartum grouping strategy on immune, metabolic, health, reproductive, and productive parameters of dairy cows  
P. R. B. Silva, J. G. N. Moraes, L. G. D. Mendonça, A. A. Scanavez, M. I. Endres, R. C. Chebel .....240

**POSTERS**

- Effect of dietary selenium sources on selenium and glutathione peroxidase concentrations and immune function in beef cattle  
Noureddine Jinane, Younes Chorfi, Yvon Couture, Alain Fournier .....241
- Hawaii beef producer animal health and welfare certification training and impact evaluation  
C. Sakamoto, H. Zaleski, J. Dobbs, E. Yoshioka, G. Graef, A. Stokes .....242
- Impact of Component® TE-G with Tylan® on performance of stocker calves  
G.L. Denney, S.P. Rodning, D.L. Rankins, J.A. Gard .....243
- Utilization of a 5- or 14-day progestin-based estrous synchronization protocol with sorted semen in beef heifers  
J.G. Powell, T.D. Lester, J.L. Reynolds, A.J. Davis, J.A. Hornsby, R.W. Rorie .....244
- Estrous response for progestin-based estrous synchronization protocols and subsequent pregnancy rates when using sorted semen in primiparous and multiparous beef cows  
J.G. Powell, T.D. Lester, A.J. Davis, .R. Lindsey, R.W. Shofner, R.W. Rorie .....245
- Performance of feedlot Nellore cattle fed with rations containing different corn genotypes  
G.E. Cunha, I.Y. Mizubuti, B.B. Sestari, R.C. Gomes, E.S. Pereira, E.L.A. Ribeiro .....246
- Liver tolerance as a mechanism for the development of BVDV persistent infection  
S.E. Morarie, N. P. Smirnova, T.R. Hansen, J. Mediger, L.Braun, C.C.L. Chase .....247
- Outcome of a bovine viral diarrhea virus infection in a South Dakota herd including reproductive losses, persistent infection, and mortality data from PI animals  
S.E. Morarie, L.J. Braun, L.D. Holler, J.D. Neill, J.F. Ridpath, C.C.L. Chase .....248
- Bovine mastitis prevalence and associated risk factors in dairy cows in Nyagatare District, Rwanda  
Iraguha Blaise, Mushonga Borden, Hamudukwanda Humphrey .....249
- Critical success factors transitioning from conventional to automatic milking in the United States  
Ben Smink, Peter Kool, Rik van der Tol .....250
- New technology for milking vacuum diagnostics helps veterinarians better understand udder health problems  
E.M. Postma .....252
- On-farm study of mastitis-associated bacteria recovered from five bedding materials  
Greg Keefe, Omid Nekouei, Ian Dohoo, Don Anderson, Jenny Yu .....253
- Types and frequencies of movements onto and off of Vermont dairy farms  
J.M. Smith .....254
- The use of homeopathic remedies in the treatment of cows with mastitis  
E.M. Boldyreva .....255

**Notice to Readers**

Articles published in the Proceedings of the American Association of Bovine Practitioners are not peer-reviewed or refereed. All statements, opinions and conclusions contained in articles in the Proceedings are those of the author(s), and are not necessarily those of the American Association of Bovine Practitioners (AABP) unless specifically approved by the AABP Board of Directors.

## American Association of Bovine Practitioners

### Prudent Drug Usage Guidelines

The production of safe and wholesome animal products for human consumption is a primary goal of members of the AABP. In reaching that goal, the AABP is committed to the practice of preventive immune system management through the use of vaccines, parasiticides, stress reduction and proper nutritional management. The AABP recognizes that proper and timely management practices can reduce the incidence of disease and therefore reduce the need for antimicrobials; however, antimicrobials remain a necessary tool to manage infectious disease in beef and dairy herds. In order to reduce animal pain and suffering, to protect the economic livelihood of beef and dairy producers, to ensure the continued production of foods of animal origin, and to minimize the shedding of zoonotic bacteria into the environment and potentially the food chain, prudent use of antimicrobials is encouraged. Following are general guidelines for the prudent therapeutic use of antimicrobials in beef and dairy cattle.

1. The veterinarian's primary responsibility to the client is to help design management, immunization, housing and nutritional programs that will reduce the incidence of disease and the need for antimicrobials.
2. Antimicrobials should be used only within the confines of a valid veterinarian-client-patient relationship; this includes both dispensing and issuance of prescriptions.
3. Veterinarians should properly select and use antimicrobial drugs.
  - a. Veterinarians should participate in continuing education programs that include therapeutics and emerging and/or development of antimicrobial resistance.
  - b. The veterinarian should have strong clinical evidence of the identity of the pathogen causing the disease, based upon clinical signs, history, necropsy examination, laboratory data and past experience.
  - c. The antimicrobial selected should be appropriate for the target organism and should be administered at a dosage and route that are likely to achieve effective levels in the target organ.
  - d. Product choices and regimens should be based on available laboratory and package insert information, additional data in the literature, and consideration of the pharmacokinetics and pharmacodynamics of the drug.
  - e. Antimicrobials should be used with specific clinical outcome(s) in mind, such as fever reduction, return of mastitic milk to normal, or to reduce shedding, contagion and recurrence of disease.
  - f. Periodically monitor herd pathogen susceptibility and therapeutic response, especially for routine therapy such as dry cow intramammary antibiotics, to detect changes in microbial susceptibility and to evaluate antimicrobial selections.
  - g. Use products that have the narrowest spectrum of activity and known efficacy *in vivo* against the pathogen causing the disease problem.**
  - h. Antimicrobials should be used at a dosage appropriate for the condition treated for as short a period of time as reasonable, i.e., therapy should be discontinued when it is apparent that the immune system can manage the disease, reduce pathogen shedding and minimize recurrence of clinical disease or development of the carrier state.
  - i. Antimicrobials of lesser importance in human medicine should be used in preference to newer generation drugs that may be in the same class as drugs currently used in humans if this can be achieved while protecting the health and safety of the animals.
  - j. Antimicrobials labeled for use for treating the condition diagnosed should be used whenever possible. The label, dose, route, frequency and duration should be followed whenever possible.
  - k. Antimicrobials should be used extra-label only within the provisions contained within AMDUCA regulations.
  - l. Compounding of antimicrobial formulations should be avoided.
  - m. When appropriate, local therapy is preferred over systemic therapy.
  - n. Treatment of chronic cases or those with a poor chance of recovery should be avoided. Chronic cases should be removed or isolated from the remainder of the herd.
  - o. Combination antimicrobial therapy should be discouraged unless there is information to show an increase in efficacy or suppression of resistance development for the target organism.
  - p. Prophylactic or metaphylactic use of antimicrobials should be based on a group, source or production unit evaluation rather than being utilized as standard practice.
  - q. Drug integrity should be protected through proper handling, storage and observation of the expiration date.
4. Veterinarians should endeavor to ensure proper on-farm drug use.
  - a. Prescription or dispensed drug quantities should be appropriate to the production-unit size and expected need so that stockpiling of antimicrobials on the farm is avoided.
  - b. The veterinarian should train farm personnel who use antimicrobials on indications, dosages, withdrawal times, route of administration, injection site precautions, storage, handling, record keeping and accurate diagnosis of common diseases. The veterinarian should ensure that labels are accurate to instruct farm personnel on the correct use of antimicrobials.
  - c. Veterinarians are encouraged to provide written guidelines to clients whenever possible to describe conditions and instructions for antimicrobial use on the farm or unit.
