# IF SHE CAN'T STAY PREGNANT, WHAT ELSE WILL SHE DO?

Keep your cows pregnant and on the job. BOVI-SHIELD GOLD FP® 5 L5 HB\* is the only viral combination vaccine to prevent Lepto hardjo-bovis for a full 365 days. Ask your veterinarian or Zoetis representative how to protect her pregnancy, your reproductive program and your bottom line. Visit [bovishieldgold.com](http://bovishieldgold.com) to learn more.

\*Do not use in pregnant cattle (abortions can result) unless they were vaccinated, according to label directions, with any BOVI-SHIELD GOLD FP or PREGGUARD GOLD FP vaccine prebreeding initially and within 12 months thereafter. Do not use in calves nursing pregnant cows unless their dams were vaccinated within the past 12 months as described above. **To help ensure safety in pregnant cattle, heifers must receive at least 2 doses of any BOVI-SHIELD GOLD FP or PREGGUARD GOLD FP vaccine with the second dose administered approximately 30 days prebreeding.**
