protects their investment!

Your clients know how to protect their investment from getting lost when they stray from the herd. They count on you to protect them from the hidden dangers of internal parasites. And for that, you know only one brand will do – Panacur[®] (fenbendazole).

Panacur is more effective than levamisole at eliminating all nine major gastrointestinal nematodes including lungworms and hookworms in cattle. Panacur provides economical low dosing at less than half the cost of

ivermectin, in three convenient forms: suspension, paste syringe and paste cartridge. And Panacur has no known contraindications.

Increased effectiveness means better performance and bigger profits, enabling your clients to deliver calves up to 32 lbs. heavier at weaning!

Protect your client's investment from internal parasites with Panacur[®] (fenbendazole)... the brand you can count on.
