For fast recovery from Bovine Respiratory Disease, *count down*

4...
Full Days Of Therapy

The result is fast recovery from BRD with fewer repulls, retreats and realizers.*

3...
Major Causes Of Bovine Respiratory Disease (BRD)

When you're treating bovine respiratory disease, your first choice should be the one that attacks

- ✓ *P. haemolytica*,
- ✓ *P. multocida* and
- ✓ *H. somnus*.

2...
Injections

Less labor and handling because animals are only injected twice in four days. Both the calf and your client get a break.

1...
Antibiotic To Use First

Hard-hitting therapy that works alone, so it lowers treatment costs.
Prescribe it 1st.

(For brief summary see page 14.)

TABLE OF CONTENTS

• Incidence of Joint Infection in Calves — <i>O.J. Kallo, Z.G. Abdul-Ghani, F.R. Khalid</i>	1
✓ • Physiology and Practice of Induction and Control of Oestrus in Cattle — <i>J. F. Roche, M. Mihm, M.G. Diskin</i>	4
• OVSYNCH: A Method for Breeding Dairy Cows Without Doing Heat Detection — <i>Brad Seguin</i>	11
• A Survey of Cystic Ovarian Disease in Practice — <i>C. L. Watson, A. J. Cliff</i>	15
✓ • Repeated Oestrus Synchrony and Fixed Time AI in Beef Cows at Pasture — <i>C.D. Penney, B.G. Lowman, N.A. Scott, P.R. Scott</i>	19
• The Effect of Estimated Breeding Dates on the Length of the Dry Period in Dairy Cows — <i>C.J. Callahan</i>	22
• Association of Twin Pregnancy Diagnosis and Parturition with Days Open, Days Pregnant at Diagnosis, Parity, and Milk Production in Dairy Cattle — <i>John D. Day, Leon D. Weaver, Charles E. Franti</i>	25
• Management of the High Yielding Dairy Cow — <i>Jack L. Albright</i>	29
• Feeding the High Producing Dairy Cow: Biotechnology, Body Condition and Reproduction — <i>Brian A. Crooker</i>	34
• Metabolic Profiling to Evaluate Nutritional and Disease Status — <i>Robert J. Van Saun, Mark Wustenberg</i>	37
• Nutritional Profiles: A New Approach for Dairy Herds — <i>Robert J. Van Saun</i>	43
• Productivity, Management and Disease in Dairy Cattle — <i>D. N. Logue</i>	51
• Pathophysiology and Treatment of Metabolic Acidosis in the Diarrhoeic Calf — <i>D.H. Grove-White</i>	56
• Routine testing for milk beta-hydroxybutyrate for the detection of subclinical ketosis in dairy cows — <i>G. Francos, G. Inslar and G. Dirksen</i>	61
• The Relationship between Nutrition and Management to Lameness in Dairy Cattle — <i>Jerry D. Olson</i>	65
• Pathogenesis of Spongiform Encephalopathies Studies in Mice — <i>Hugh Fraser</i>	69
✓ • The Role of Dietary Meat and Bone Meal in the Spread of BSE — <i>D.M. Taylor</i>	71
• The Topographic Distribution Pattern of Vacuolation in the Central Nervous System of Cattle Infected Orally with Bovine Spongiform Encephalopathy — <i>S.A.C. Hawkins, G.A.H. Wells, M.M. Simmons, I.W.H. Blamire, S.C. Meek & P. Harris</i>	73
• Prospects For a Preclinical Diagnostic Test — <i>R. A. Sommerville, C.F. Farquhar, C.R. Birkett</i>	77
✓ • Can a Link Between Cattle and Human Disease be Proven or Disproven? — <i>M. E. Bruce</i>	79
• One-Year Survival of Cows with Left Displacement of the Abomasum Corrected with the Role-and-Toggle Procedure — <i>Jorgen Grymer, Paul C. Bartlett, Hans Houe, Keith E. Sterner</i>	80

- Cohort Study of Milk Production and Days to First Insemination Following Roll-and-Toggle LDA Correction — *Paul C. Bartlett, Jorgen Grymer, Hans Houe, Keith E. Sterner* 83
- ✓ • Vaccination with Bovine Herpesvirus 1 Inactivated Vaccine Cannot be Considered as a Stimulus of Reactivation — *Etienne Thiry* 86
- ✓ • Serum Antibody Response in Calves Receiving Modified Live and/or Inactivated Vaccines Containing Bovine Herpesvirus-1, Bovine Viral Diarrhea Virus, Parainfluenza-3 Virus, and Bovine Respiratory Syncytial Virus, Immunogens — *Robert W. Fulton, Lurinda J. Burge, J.M. d'Offay, Mark E. Payton* 90
- Age and the Effectiveness of Chewing During Eating in Holstein Cows — *R.N. Corley III, M.R. Murphy and J.E. Wold* 97
- Pathological Temperament Changes in Bovine Animals — *A.R. Austin, M.M. Simmons and G.A.H. Wells* 99
- Understanding Cow Behavior — *John Roberts* 104
- Getting a Water Meter to Work for You — *John Roberts* 108

STUDENT CLINICAL REPORTS

- A Practical Approach to the Diagnosis of a Dairy Herd Problem: A Case Report — *Susan K. Bradish* 111
- Different Syndromes Associated with Bovine Coronavirus *Todd R. Conner* 115

ANY TIME SHE MISSES CONCEPTION IT TAKES MONEY OUT OF YOUR POCKET

Any time one of your clients' cows misses conception it takes money right out of his pocket.

You can do something to change that. Your clients can keep their herds productive and profitable. CYSTORELIN® is used in over three out of

four dairy cows that are treated with a GnRh product. In fact, it has become the standard by which all other GnRH products are judged.

Prescribe CYSTORELIN® for your clients...it pays.

For more information, call Rhone Merieux at 1-800-934-4447.

AABP Publication Dates

On the recommendation of the Strategic Planning Committee and the AABP Editor, the Board of Directors approved the following:

	1998	1998
<i>The Bovine Practitioner</i>	January	May
<i>Annual Proceedings</i>	September	

Deadlines for submitting manuscripts.

<i>The Bovine Practitioner</i>	October 15, 1997	February 15, 1998
<i>Annual Proceedings</i>	April 15, 1998	

Instructions for submitting articles for *The Bovine Practitioner / Proceedings*

1. Articles should be supplied to the Editor on 3½" HD (high density) diskettes, using Word Perfect or Microsoft Word programs.
2. Include a printed copy of the article with the diskette.
3. All charts, tables, drawings, etc., should be sent as separate pieces on an 8½" x 11" sheet of paper. Oversize art is preferred, as printer will size to fit.
4. If photos are used, send 3½" x 5" prints (not negatives). Printer will size to fit.
