Plan to attend the
51st ANNUAL CONFERENCE

Phoenix, Arizona
September 13-15, 2018

Moraxella bovoculi Bacterin

World's First Commercially Available *Moraxella bovoculi* Pinkeye Preventative!

- 8 Different *M. bovoculi* Isolates
- Cost Effective for All Cattle Herds
- Proven Safety Record
- More Convenient than Autogenous Programs

Addison Biological Laboratory, Inc. announces the approval of the world's first commercial *Moraxella bovoculi* vaccine for the prevention of pinkeye in cattle. This USDA conditionally licensed product is the first of this kind. Previously the only method of prevention against *Moraxella bovoculi* was autogenous services. This vaccine signifies a breakthrough in convenience for the large number of veterinarians and herd owners battling the challenging problem of pinkeye caused by *Moraxella bovoculi*. This product license is conditional; efficacy and potency have not been fully demonstrated.

From the LEADERS in pinkeye prevention!

THE BOVINE PRACTITIONER is the official publication of The American Association of Bovine Practitioners, published in the spring and summer annually. It serves as a communication medium between bovine practitioner organizations around the world. All manuscripts and communications must be presented in English. Beginning in 2017, THE BOVINE PRACTITIONER is an open access journal following a 6-month post-publication embargo to allow AABP members and veterinary medical libraries first access.

Copies of THE BOVINE PRACTITIONER are available to non-members for \$30.00 per copy for domestic destinations, or \$35.00 for international addresses. **Contact editor for details.**

Editorial Review Board 2017

Articles in *The Bovine Practitioner* have been reviewed by three Editorial Review Board members.
Reviewers for 2017 included:

Dr. Rafael S. Bisinotto
Gainesville, FL

Dr. Carla Huston
Mississippi State, MS

Dr. Pablo J. Pinedo
Ft. Collins, CO

Dr. Billy Smith
Kennett Square, PA

Dr. Ruth Blauwiel
Colchester, VT

Dr. Max Irsik
