Moraxella bovoculi Problems?

Moraxella bovoculi SOLUTION!

The Addison Autogenous Program

- Complete Diagnostic and Autogenous Support
- Fast Delivery on Initial Order
- Excellent Syringeability
- Exceptional Safety Record

MAXI/GUARD® Pinkeye Bacterin has earned the trust of bovine practitioners as the preferred pinkeye preventative when the disease is caused solely by *M. bovis*. However, the problem can be caused by the combination of *M. bovis* and *M. bovoculi* bacteria. Unfortunately no commercial vaccines provide that coverage. When *M. bovoculi* is present, your best option is utilizing MAXI/GUARD® along with the Addison Autogenous Program. We can assist you from diagnosing the problem to creating the solution!

From the LEADERS in pinkeye prevention!

e-mail: aabphq@aabp.org

http://www.aabp.org

THE BOVINE PRACTITIONER is the official publication of The American Association of Bovine Practitioners, published in the spring and summer annually. It also serves as a communication medium between bovine practitioner organizations around the world. All manuscripts and communications must be presented in English.

Copies of THE BOVINE PRACTITIONER are available to non-members for \$30.00 per copy for domestic destinations, or \$35.00 for international addresses. Contact editor for details.
