Moraxella bovoculi SOLUTION!

The Addison Autogenous Program

- **Complete Diagnostic and Autogenous Support**
- **Fast Delivery on Initial Order**
- **Excellent Syringeability**
- **Exceptional Safety Record**

an Association of Bovine Practitioners; open access distribution.

MAXI/GUARD® Pinkeye Bacterin has earned the trust of bovine practitioners as the preferred pinkeye preventative when the disease is caused solely by *M. bovis*. However, the problem can be caused by the combination of *M. bovis* and *M. bovoculi* bacteria. Unfortunately no commercial vaccines provide that coverage. When *M. bovoculi* is present, your best option is utilizing MAXI/GUARD® along with the Addison Autogenous Program. We can assist you from diagnosing the problem to creating the solution!

From the LEADERS in Pinkeye Prevention!

REWRITING THE BOOK ON BRD TREATMENT

Zelnate™ DNA Immunostimulant is a new chapter in BRD management.

Zelnate is the first licensed immunostimulant that aids in the treatment of BRD associated with *Mannheimia haemolytica*. By jumpstarting the innate immune system — which has been shown to provide a rapid, potent and broad protective response to infectious agents — Zelnate helps reduce lung lesions and mortality in cattle. Administer Zelnate at the time of, or within 24 hours after, a perceived stressful event.

visit zelnate.com for more information
