

Vol. 50, No. 2  
SUMMER 2016

# *The Bovine* **PRACTITIONER**

THE OFFICIAL PUBLICATION OF THE  
AMERICAN ASSOCIATION OF BOVINE PRACTITIONERS

Plan to attend the  
**50th ANNUAL CONFERENCE**

Omaha, Nebraska  
September 14-16, 2017

# Moraxella bovoculi Problems?

# Moraxella bovoculi SOLUTION!

## The Addison Autogenous Program

- Complete Diagnostic and Autogenous Support
- Fast Delivery on Initial Order
- Excellent Syringeability
- Exceptional Safety Record

MAXI/GUARD® Pinkeye Bacterin has earned the trust of bovine practitioners as the preferred pinkeye preventative when the disease is caused solely by *M. bovis*. However, the problem can be caused by the combination of *M. bovis* and *M. bovoculi* bacteria. Unfortunately no commercial vaccines provide that coverage. When *M. bovoculi* is present, your best option is utilizing MAXI/GUARD® along with the Addison Autogenous Program. We can assist you from diagnosing the problem to creating the solution!

*From the LEADERS in Pinkeye Prevention!*

# REWRITING THE BOOK ON BRD TREATMENT

**Zelnate™ DNA Immunostimulant is a new chapter in BRD management.**

Zelnate is the first licensed immunostimulant that aids in the treatment of BRD associated with *Mannheimia haemolytica*. By jumpstarting the innate immune system — which has been shown to provide a rapid, potent and broad protective response to infectious agents — Zelnate helps reduce lung lesions and mortality in cattle. Administer Zelnate at the time of, or within 24 hours after, a perceived stressful event.
