

Vol. 53, No. 1  
SPRING 2019

# *The Bovine* PRACTITIONER

THE OFFICIAL PUBLICATION OF THE  
AMERICAN ASSOCIATION OF BOVINE PRACTITIONERS

## 52nd ANNUAL CONFERENCE

St. Louis, Missouri  
September 12-14, 2019

# Moraxella bovoculi Bacterin

## World's First Commercially Available Moraxella bovoculi Pinkeye Preventative!

- **8 Different M. bovoculi Isolates**
- **Cost Effective for All Cattle Herds**
- **Proven Safety Record**
- **More Convenient than Autogenous Programs**

Addison Biological Laboratory, Inc. announces the approval of the world's first commercial Moraxella bovoculi vaccine for the prevention of pinkeye in cattle. This USDA conditionally licensed product is the first of this kind. Previously the only method of prevention against *Moraxella bovoculi* was autogenous services. This vaccine signifies a breakthrough in convenience for the large number of veterinarians and herd owners battling the challenging problem of pinkeye caused by *Moraxella bovoculi*. This product license is conditional; efficacy and potency have not been fully demonstrated.

***From the LEADERS in pinkeye prevention!***

THE BOVINE PRACTITIONER is the official publication of The American Association of Bovine Practitioners, published in the spring and summer annually. It serves as a communication medium between bovine practitioner organizations around the world. All manuscripts and communications must be presented in English. Beginning in 2018, THE BOVINE PRACTITIONER is an open access journal following a 6-month post-publication embargo to allow AABP members and veterinary medical libraries first access.

Copies of THE BOVINE PRACTITIONER are available to non-members for \$30.00 per copy for domestic destinations, or \$35.00 for international addresses. **Contact editor for details.**

# Table of Contents

Systematic review and meta-analysis comparing arrival versus delayed vaccination of high-risk beef cattle with 5-way modified-live viral vaccines against BHV-1, BRSV, PI3, and BVD types 1 and 2 <b>Emily R. Snyder, Brent C. Credille, Brad D. Heins</b> .....	1
A randomized trial comparing effects of respiratory disease metaphylaxis with gamithromycin or ceftiofur crystalline free acid on the health, performance, and economic return of auction market-derived stocker calves backgrounded on Missouri pastures <b>Diana M.A. Valencia, Martin L. Liebstein, Peggy A.R. Thompson, David G. Renter</b> .....	10
Case report: Management of <i>Klebsiella</i> spp mastitis on a dairy farm <b>Michael D. Kleinhenz, Joshua A Ydstie, Patrick Gorden</b> .....	19
Dairy veterinarians' views on antimicrobial use, resistance and treatment practices <b>Stephanie Webb, Craig McConnel, Sarah Giebel, Jennifer Brinson, Dale A. Moore</b> .....	28
Assessment of selenium and vitamin E supplementation by systemic injection at birth on pre-weaning calf health <b>Ken E. Leslie, Brian Nelson, Sandra M. Godden, Todd F. Duffield, Trevor J. DeVries, David L. Renaud</b> .....	44
Retrospective study – Investigating the downer cow syndrome <b>P.J. Poulton, A.D. Fisher, P.D. Mansell, M.F. Pyman</b> .....	54

# Klebsiella mastitis now has nowhere to hide.

**New KLEBVax™ with SRP® technology keeps cows healthy and productive.**

KLEBVax™ is the first vaccine licensed for mastitis infections caused by Klebsiella – an increasingly challenging disease in dairy cattle. Based on Siderophore Receptor and Porin (SRP®) technology, KLEBVax is an exciting new tool to fight Klebsiella mastitis in your customers' dairy operations.

**Ask your Huvepharma representative about new KLEBVax.**
