

New AABP Officers and Directors 2018-2019

President

Dr. Glenn Rogers grew up in the North Central Texas town of Graham, near his family's ranching operation. His experiences with ranching, FFA and a local practitioner led him to decide as a high school sophomore that he wanted to be a cattle veterinarian.

Glenn graduated from the Texas A&M College of Veterinary Medicine in 1980. While at A&M, he served as president of the AABP student chapter. The highlight of his tenure as president was hosting Brian Sinclair (Tristan Farnon from "All Creatures Great and Small") for a large, successful on-campus meeting. Spending time with Dr. Sinclair and his wife after the meeting (in the relaxed confines of the hotel bar) was a memorable experience. While in veterinary school, Glenn first attended an AABP Annual Conference in 1979, and has rarely missed one since.

After graduation, Glenn practiced for 11 years in North Central Texas where he owned and operated two rural mixed practices. While in practice he was a typical, over-committed rural veterinarian and served as a director of the Texas Veterinary Medical Association for 10 years, president of the West Cross Timbers VMA for three years, president of the Palo Pinto County Farm Bureau, served on the school board, and served in several other areas of organized veterinary medicine, his community and church. During this time, Glenn also participated in several mission trips to Haiti

with Christian Veterinary Mission.

In 1991, Glenn made a decision to leave a successful rural practice and ranching operation to pursue post-graduate training in beef production medicine at Kansas State University, which resulted in other opportunities outside of veterinary practice. He received his Master's in Beef Production Medicine in 1993. While at Kansas State, he participated in the inaugural Beef Production Management Series at the Great Plains Veterinary Education Center in Clay Center, Neb.

In 1993, Glenn accepted a Ruminant Production Medicine position at North Carolina State University, became a tenured associate professor, served as the faculty representative for the active AABP student chapter, was responsible for developing a student large animal externship program and beef production medicine elective courses, and receive the Outstanding Extension Service Award. In 1995 Glenn became a Diplomate of the American Board of Veterinary Practitioners in Beef Cattle. Glenn's son Ben was born while he was on the faculty at NCSU, and he was named in honor of the late Dr. Ben Harrington, a pioneer in establishing the NCSU-CVM and one of the early AABP presidents.

Glenn returned to Texas in 2000, and from 2001-2013, he was a technical veterinarian for Pfizer Animal Health and managed beef technical services colleagues in the western US. In 2007, he was honored with the Pfizer W.E. Upjohn Award for innovation in creating a unique beef herd health planning platform.

Throughout his 39+ years since graduation from veterinary school, he has also been very engaged in his family ranching operation. He has operated a beef heifer development business and managed several other ranch-related enterprises since 2000. He develops and markets over 800 primarily Red Angus beef heifers annually. Glenn is passionate about ranching and range management. He has received several ranch conservation awards, including the Conservation Rancher of the Year Award for the State of Texas in 2017. Dr. Rogers continues to speak to various producer and veterinary audiences and provides consulting services to several organizations. In 2018, Glenn was honored as "Consultant of the Year" by the Academy of Veterinary Consultants. Dr. Rogers serves as a Trustee of the Send A Cow organization which supports agriculture sustainability projects in six African countries.

Glenn has served the AABP in many capacities, including the planning committee, chair of the Practice Tips session, chairman of the Cow-Calf session, local arrangements coordinator, speaker, moderator, and active participation in several committees including Animal Welfare. He served as the AABP Director from District 8 (representing Texas, Arkansas, and Louisiana) from 2006-2012, and served as chairman of the nominating committee and co-chair of the Membership Committee. He served as a director and then chairman of the AABP Foundation. In 2015, he was awarded the AABP Distinguished Service Award. Glenn is also an active member of the Texas and Southwestern Cattle Raisers and member of NCBA, AVC, and the Society for Theriogenology.

Glenn has four children: Meg (a MD), Ginny (an attorney), Ben (21 and Texas A&M student), and 15-year old Leah (a cheerleader, champion pole-vaulter and source of his grey hair). He has five grandchildren. Glenn's wife Mandy is also a veterinarian and operates a small animal house call practice.

Glenn's unique and diverse experiences in private practice, academia, industry and as a cattle producer provide a broad perspective in understanding the challenges and opportunities facing bovine veterinarians, now and in the future.

Vice-President

Dr. Carie Telgen grew up on a 150 head registered Holstein herd in Vermont. She received her BS degree from Cornell University and her DVM degree from Purdue University. Dr. Telgen started her career in northern New York in a mixed animal practice before joining Battenkill Veterinary Bovine in 2011 where she became partner in 2015. She has completed the Cornell Summer Dairy Institute and the Penn State Dairy Production Medicine Program.

Since becoming an AABP member as a veterinary student, Dr. Telgen was a recipient of the prestigious Amstutz Scholarship Award. She has served as Vice Chair of the Membership Committee, and the Membership Task Force. Additionally, she served on the 2015 AABP Nomination Committee. Dr. Telgen is currently the Vice President of AABP and served as the Pre-conference seminar chair for the 2019 AABP Conference. Along with AABP, Dr. Telgen is also a member of the AVMA, Capital District Veterinarians and a board member of the Washington County, NY Farm Bureau.

Dr. Telgen has always been a strong advocate for agriculture and spent some time writing a blog about daily large animal practice, hoping to educate her readers on agriculture and its practices. She also volunteers time at, and sits on the

advisory board for, the New York State Fair's new Dairy Cattle Birthing Center, answering questions the public may have on modern farming practices. Dr. Telgen has a passion to reconnect society to agriculture while promoting the technological advances in the industry.

In her free time, Dr. Telgen enjoys spending time with her family, kayaking, camping, hiking, and softball. She currently resides in Hartford, New York.

New Directors

Dr. Elizabeth Brock is the newly elected director for District 1. Dr. Liz Brock hails from central New Hampshire where she grew up with a love of cows, though she did not meet one in person until reaching the University of New Hampshire. She participated in the CREAM program in her sophomore year, and was hooked on dairy! After graduation, she worked as a herdsman on a small educational farm in southern New Hampshire. Interacting with the public on the farm on a daily basis inspired Liz to find ways to translate the realities of modern agriculture to the public and make it easier for farmers to just farm. She worked for several years in nutrient management and conservation planning in NH and VT. After receiving a Master of Science degree in Soil Science from Cornell University, she spent four years with the American Farmland Trust as an advocate for farmland protection and municipal planning. Ultimately, however, Liz found that she missed the cows and working with farmers on a more tangible level. She returned to Cornell University to earn the DVM degree, graduating in May 2015. Liz happily returned to New England to join Northwest Veterinary Associates in June of 2015. She enjoys the day to day labor of private

practice and is passionate about problem solving for her clients. She loves the balance of individual animal health and population medicine provided by the range of dairy farm clients her practice services. For example, she has helped several clients set up on farm milk culture labs to aid in data-based decision making, while at the same time treating a squamous cell carcinoma in a 15 year old retired oxen. She remains actively involved in advocacy and outreach efforts in the region including the VT Breakfast on the Farm, an annual event bringing over 3,000 people to dairy farms for a pancake breakfast and tour. Liz believes passionately that the future of dairy farming lies both innovation within the farm and education off of it.

Liz and her husband are proud parents to two young sons. When not working, Liz and the family can be found outdoors; hiking, kayaking, skiing, running and hunting. When the weather is too unbearable to be outside, Liz enjoys a quality craft VT beer and a Red Sox/Patriots ball game.

Dr. Randall Hinshaw is the new Director representing District 2. Dr. Hinshaw received his Doctor of Veterinary Medicine degree in 1982 from the University of Georgia. Upon graduation, he joined Ashby Herd Health Services which is a bovine exclusive practice in the Shenandoah Valley of Virginia. His main duties were clinical medicine and surgery as well as dairy production management medicine. The practice grew from a two to seven-person practice during his tenure. His embryo transfer practice began in 1983 with the collection of his first donor. The embryo transfer business continued to grow, and in 1995 he made the decision to focus full time on embryo transfer and reproductive ultrasound by creating Ashby Embryos, now Ashby Genetics. He has performed services for clients in 16 states and Puerto Rico.

Randall has been involved with training veterinarians nationally in embryo transfer as the coordinator of the American Association of Bovine Practitioners Edwin Robertson Beginning Embryo Transfer Seminar. He has given presentations to producers and professional educational meetings across the country. He has served as president of the Virginia Academy of the Food Animal Practitioners, member of the board of the American Embryo Transfer Association, and president of the American Embryo Transfer Association. His professional memberships include the American Association of Bovine Practitioners, American Embryo Transfer Association, International Embryo Technology Society, Society for Theriogenology, American Veterinary Medical Association, Virginia Academy of Food Animal Practice, and Virginia Veterinary Medical Association.

Randall received the American Embryo Transfer Association President's Award in 2005, the American Association of Bovine Practitioners Practitioner of the Year Award in 2006, and the Paul F. Landis Virginia Veterinarian of the Year Award in 2011 from the Virginia Veterinary Medical Association.

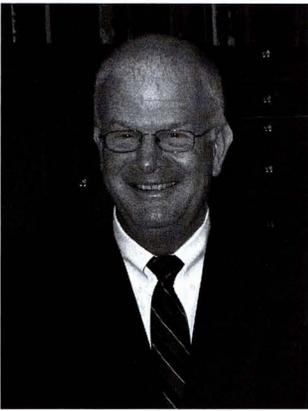

Randall married Linda in 1982, and they have 3 married daughters and 11 grandchildren. He enjoys spending time with his wife, daughters and their spouses, and his grandchildren. When he has free time, he likes to fish and enjoy the outdoors.

Dr. Wilfred Schuler is the new Director representing District 5. Dr. Wilfred "Wil" Schuler is a 1987 graduate of Kansas State University. Immediately following graduation Dr. Schuler joined Veterinary Associates SC, located in Hazel Green, Wisconsin and Galena, Illinois where he continues to practice today. He is the immediate Past President of Veterinary Associates and continues to serve dairy and beef clients in SW Wisconsin and NW Illinois. A member of AABP since 1987, he credits the AABP for advancing his skills as a dairy/beef veterinarian and as a business owner through educational opportunities made available by the organization. In addition to membership in the AABP, he is a member of the National Mastitis Council, and was recently appointed to the Milk Quality and Udder Health Committee of the AABP. Wil is past president of the SWVMA, past District Representative to the WVMA, past Grand Knight Council 7370 Knights of Columbus, past parish council member at St. Frances de Sales Parish, and a founding board member of the Hazel Green Gymnastics Club. He is a current board member of Innovative Veterinary Services - a collective group of veterinary clinics currently

representing 14 veterinary practices located in 6 states.

Dr. Schuler and his wife Gail have 5 children - Dr. Adlai Schuler (DVM), Sr. Josephine Marie Schuler CFR, Hayley Stabo, Morgan Maternoski, Blair Schuler, along with 5 grandchildren. When not on farms in Wisconsin or Illinois, he enjoys spending time on his family farm in NE Kansas, fishing with family and friends, hunting, gardening, and cooking a good steak!!

Dr. Arn Anderson is the new Director representing District 8. Arn Anderson, DVM, DABVP (Beef), received the BS degree in Animal Science (1983) and a MAg degree in Animal Science (Beef Cattle Production) in 1985 from TAMU, and the DVM degree from VMRCVM in 1991. He has practiced at Cross Timbers Veterinary Hospital since 1994, and became a partner in 1997 and the sole owner in 2015. His primary interest involves cow-calf production medicine and the management of rural mixed-animal practices. Arn has developed a recognized student externship program for veterinary students wishing to pursue mixed-animal rural practice. Currently 14 students a year participate in the program, and represent veterinary schools from across the United States, Canada, Europe, and South America. He completed the Beef Cattle Production Management program at GPVEC in 2008, and became a diplomate of the ABVP (Beef) in 2012.

Dr. Anderson has been active in the AABP serving as a member and Chair on the AABP Student Membership Committee, and a member of the program committee. Arn has presented several times at the AABP convention and enjoys mentoring veterinary students. He has served on the SFT board representing beef cattle. He is also a member of the AVC, AVMA, TVMA, and SFT and is a member of the Texas Trichomoniasis Working Group. Dr. Anderson presents on a regular basis for Texas Cattle Raisers Association, South West Veterinary Symposium and other local, regional and national meetings. He serves as a practice mentor for a practice group involving five practices and ten rural practitioners in North Texas. He also lectures at TAMU CVM for the third year Herd Health Course.

In Montague County, Texas, Dr. Anderson has been active with the Boy Scouts, FFA, and St. Peters Lutheran Church. He and his wife, Belinda, live on a century old family farm outside Bowie, Texas, and enjoy raising Sim-Angus and Red Angus cattle and herding two grandsons.

2018 AABP Board of Directors and Officers

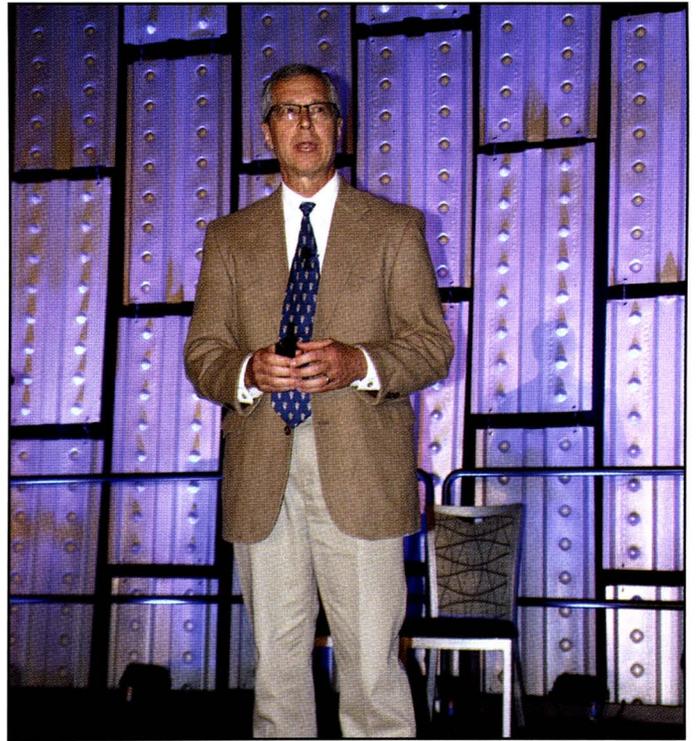

Front Row (L-R): Dr. Carie Telgen, Dr. Christine Navarre, Dr. Mark Thomas, Dr. Eric Behlke, Dr. Lee Jones, Dr. Dale Moore, Dr. Vickie Cooper, Dr. Gerry Koenig
Back Row (L-R): Dr. Bryan Halteman, Dr. Tom Massie, Dr. Joe Hillhouse, Dr. Hunter Lang, Dr. Wayne Shewfelt, Dr. Mike Apley, Dr. Glenn Rogers, Dr. Carl Meyer, Dr. Mark Hardesty, Dr. Jeff Ondrak, Dr. Calvin Booker. (photo courtesy of Geni Wren)
